PROFESSIONAL SUMMARY
Tech-savvy Full Stack Web Developer and IT graduate from Our Lady of Fatima University. At 22, I have hands-on experience with Java, Node.js, PHP, MySQL, and React. Skilled in front-end and back-end development, I excel at creating servers, managing databases, developing APIs, and building user-friendly web applications. Proficient in Figma for UI/UX design, I'm eager to tackle new challenges and deliver impactful projects in collaborative environments.

SKILLS

- Front-End Skills: HTML, CSS
- Back-End and Database Skills
- Problem-Solving
- Attention to Detail
- Project Management
- Communication
- Adaptability
- Time Management

WORK HISTORY

Aug 2024 - Aug 2024 Caloocan City, Metro Manila, Philippines (Remote)

Full Stack Web Developer
- Used MySQL for efficient database management, supporting smooth storage and retrieval of user data, built dynamic backend functionalities with PHP, and crafted engaging and responsive front-end interfaces with HTML, CSS, and JavaScript to enhance user interaction.
- Increased website performance by optimizing front-end and back-end code for faster loading times.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.

May 2024 - Jul 2024

Freelance Multi-Platform Visual Designer / Fiverr
- Crafted compelling graphics, advertisements, and high-quality video content for a diverse range of clients
- Aligned deliverables with client branding and marketing objectives
- Efficiently managed project timelines to ensure timely delivery.
